TECHNICAL SKILLS

Programming Languages: Java , Python, Dart, JavaScript, SQL, HTML/CSS

Mobile Development: Flutter, Dart, React Native, Firebase, Google Play Console, App Store Deployment

Backend Development: FastAPI, Flask, Node.js,, REST APIs, Gunicorn, Nginx

Databases: MySQL, Firebase Realtime DB , Supabase

AI / Machine Learning: PyTorch, OpenCV, MediaPipe, Hugging Face , LLM Integration, LangChain, OpenAI API, Pandas, NumPy

DevOps & Deployment: Docker, Redis , Hugging Face Spaces, Vercel

Tools & Platforms: Git/GitHub, VS Code, Android Studio

EXPERIENCE

Flutter Development Intern | [Certificate](#)

2024 | 3 Months

Dream Webbies Technologies · On-Site

Nanded , MH, India

- Developed and enhanced cross-platform mobile application modules using Flutter and Dart, focusing on responsive UI and smooth userexperience.
- Collaborated on frontend and backend integration, wiring REST APIs and managing application state across features.
- Identified, debugged, and resolved functional issues to improve app stability and reduce runtime errors before release.

PROJECTS

RemoveAnything.in | [Details](#)

Production | 2026 May – Present

Flask - Python – OpenCV - Docker - Nginx - Gunicorn - Hugging Face Spaces

- Built and deployed an AI-powered image object/background removal platform with an end-to-end upload, AI inference, and download pipeline.
- Processed **500+ images** for **50+ organic users**, maintaining an average inference latency of **<5s/image** and **98%+ successful processing**.
- Containerized and deployed the application using **Docker, Gunicorn, Nginx, and Hugging Face Spaces**, ensuring **99%+ service availability** and reliable production inference.
- Engineered secure file validation, image preprocessing, automated cleanup, and optimized asset delivery, handling **1GB+** of user-uploaded images.

Recipe API | [Github](#)

NestJS - TypeScript - PostgreSQL - Prisma - Docker

- Designed and developed a production-ready **RESTful Recipe Management API** with CRUD operations, layered **Controller–Service–Repository architecture**, and automatic API documentation using Swagger.
- Normalized the database into **Category (Many-to-One), Ingredient (One-to-Many), and Tag (Many-to-Many)** relationships, improving data integrity while eliminating redundant records through foreign keys and cascade rules.
- Implemented **DTO validation, centralized exception handling, pagination, filtering, and transactional updates**, ensuring reliable data consistency and maintainable business logic.
- Built and tested **15+ REST endpoints** with Prisma ORM and PostgreSQL, supporting nested entity operations, cascading deletes, and repository based abstractions for scalable backend development.

Real Estate Ai | [Github](#)

Flask · Python · Bland AI · Google Sheets API · REST API

- Developed an AI-powered outbound calling platform that automates real estate lead outreach using **Bland AI**, enabling scalable voice-based customer engagement.
- Built RESTful APIs for **batch call scheduling, lead management, and real-time webhook processing**, integrating Google Sheets as a lightweight CRM database.
- Implemented automated call logging, status tracking, and analytics, providing agencies with centralized visibility into lead interactions and campaign performance.
- Designed a modular Flask backend with secure API integrations and asynchronous callback handling, simplifying deployment and future CRM integrations.

EDUCATION

SGGS Institute of Engineering & Technology, Nanded

B.Tech, Information Technology **CGPA: 7.5**

Aug 2025 – Jun 2028

Diploma, Computer Science (MSBTE)

Gramin Technical & Management Campus, Nanded Percentage: 90.17

June 2022 – May 2025

CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Model Context Protocol Anthropic (Issued Jul 2026)
- Deloitte Australia – Data Analytics Job Simulation Forage (Issued Aug 2025)
- Solved 90+ leetcode questions
- Participated in 2x Hackathons
